

### Why A Tune-UP?

In 1983, the Louisiana Cooperative Extension Service at Louisiana State University teamed up with Gulf States

Power to identify what benefits if any were provided by an air conditioning tune-up. A series of homes were heavily instrumented, data was collected over time, tune-ups were performed and data was collected again.

The results of this landmark study were staggering. The researchers found that tune-ups saved energy and restored lost capacity. How much?

***Average Monthly Savings From a  
Tune-Up...\$32.76  
Average Cooling Capacity  
Restored...0.79 Tons***

**The researchers concluded that:**

Air conditioning maintenance benefits the consumer by lowering his operational costs, increasing his comfort control capacity and is believed to extend equipment life
